CAREER OBJECTIVE

Inquisitive fourth-year Information Technology student with hands-on experience in backend web development, RESTful API development, and database management. Experienced in building backend systems using Node.js, Express.js, MongoDB, and MySQL through academic and collaborative projects. Passionate about continuous learning and developing scalable, efficient solutions. Seeking a backend developer internship to apply technical skills while contributing to a collaborative and growth-oriented environment.

SKILLS

- **Languages:** JavaScript, PHP, SQL
- **Libraries/Frameworks:** Node.js, Express.js, Mongoose
- **Databases:** MongoDB, MySQL
- **Tools & Technologies:** Git, GitHub, npm, RESTful APIs, CRUD Operations, JSON Handling, Postman, VS Code, XAMPP, phpMyAdmin

EDUCATION

Bachelor of Science in Information Technology

Expected Graduation: 2027

- Holy Angel University
- *Relevant Courses:* Data Structures and Algorithms, Advanced Database Systems, Web Server and Client Services

ACADEMIC PROJECTS

Iponly – Gamified Budget Management Web Application

- Developed RESTful backend APIs for authentication, expense tracking, budgeting, and leaderboard features using Node.js and Express.js.
- Designed MongoDB schemas and implemented CRUD operations with Mongoose to improve data consistency and application performance.
- Integrated JWT authentication and password hashing for secure user access and account management.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt, Express-Async-Handler

TeamUP! – Gamified IT & Development Freelance Services Marketplace Website

- Developed backend APIs for authentication, role management, experience point tracking, and project/task management using Express.js and MongoDB.
- Structured MongoDB schemas and implemented CRUD operations with Mongoose for efficient data handling and scalability.
- Implemented secure authentication and asynchronous request handling using JWT, Bcrypt, and Express-Async-Handler.

Tech Stack: Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt, Express-Async-Handler

The Garage – Car Rental Website

- Developed backend features and admin dashboard functionality for managing users, vehicles, and rental transactions.
- Implemented rental workflow logic and vehicle availability tracking using PHP and MySQL.

Tech Stack: PHP, MySQL, JSON, CRUD Operations

CERTIFICATIONS

- 6WCSERVER Level 1 Badge JavaScript & Node.js – Canvas Credentials (Badgr) - Oct 2025
- freeCodeCamp Back End Development and APIs - Sep 2025
- freeCodeCamp Legacy JavaScript Algorithms and Data Structures - Sep 2025
- freeCodeCamp Legacy Responsive Web Design - Aug 2024
