CAREER OBJECTIVE

Aspiring Web Developer with hands-on experience in frontend development, RESTful API development, and database management. Experienced in building web applications using Next.js, Node.js, Express.js, MongoDB, and MySQL through internship and collaborative academic projects. Familiar with UI mockup design using Figma, website documentation, and secure API development. Eager to contribute technical skills and develop responsive, efficient, and user-friendly web solutions in a collaborative development environment.

SKILLS

- **Languages:** JavaScript, PHP, SQL, HTML5, CSS3
- **Libraries/Frameworks:** Node.js, Express.js, Angular, React (Basic), Next.js (Basic), Mongoose
- **CSS Frameworks:** Tailwind CSS
- **Databases & ODM:** MongoDB, MySQL
- **Tools & Technologies**: Git, GitHub, npm, Figma, RESTful APIs, CRUD Operations, JSON Handling, Postman, VS Code, XAMPP, phpMyAdmin

WORK EXPERIENCE

IT Intern

St. Catherine of Alexandria Foundation and Medical Center | July 2026 – September 2026

- Developed the frontend of the company's informational website using Next.js.
- Created UI mockups and website layouts using Figma to guide the development process.
- Collaborated with the team to document the website's structure, features, and functionality.

EDUCATION

Bachelor of Science in Information Technology Expected Graduation: April 2027

- Holy Angel University

ACADEMIC PROJECTS

Iponly – Gamified Budget Management Web Application

- Developed RESTful backend APIs for authentication, expense tracking, budgeting, and leaderboard features using Node.js and Express.js.
- Designed MongoDB schemas and implemented CRUD operations with Mongoose to improve data consistency and application performance.
- Integrated JWT authentication and password hashing for secure user access and account management.

Tech Stack: *Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt, Express-Async-Handler*

TeamUP! – Gamified IT & Development Freelance Services Marketplace Website

- Developed backend APIs for authentication, role management, experience point tracking, and project/task management using Express.js and MongoDB.
- Structured MongoDB schemas and implemented CRUD operations with Mongoose for efficient data handling and scalability.
- Implemented secure authentication and asynchronous request handling using JWT, Bcrypt, and Express-Async-Handler.

Tech Stack: *Node.js, Express.js, MongoDB, Mongoose, JWT, Bcrypt, Express-Async-Handler*

CERTIFICATIONS

- freeCodeCamp Front End Development Libraries – (In Progress)
- 6WCSERVER Level 1 Badge JavaScript & Node.js – Canvas Credentials (Badgr) - Oct 2025
- freeCodeCamp Back End Development and APIs - Sep 2025
- freeCodeCamp Legacy JavaScript Algorithms and Data Structures - Sep 2025
- freeCodeCamp Legacy Responsive Web Design - Aug 2024
